

PRAKASH RAWAT

Data Analyst | Python & SQL | Power BI | Machine Learning

Haldwani, Uttarakhand | +91 8279338375 | officialprakash400733@gmail.com | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Results-driven Junior Data Analyst with hands-on experience in end-to-end data analysis, business intelligence development, and machine learning workflows. Proficient in Python (Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn), advanced SQL, and Power BI (DAX, Power Query). Skilled at transforming raw datasets into actionable insights through exploratory data analysis (EDA), statistical modeling, and interactive KPI dashboards. Adept at working across industries including fintech, robotics, and enterprise analytics. Seeking a full-time Data Analyst role where I can drive data-informed decisions and contribute to organizational growth.

CORE TECHNICAL SKILLS

Languages & Libraries: Python (Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn, MediaPipe), SQL (Advanced Joins, Window Functions, Subqueries, CTEs)

BI & Visualization: Power BI (DAX, Power Query, Data Modeling), Advanced Excel (XLOOKUP, INDEX-MATCH, Pivot Tables, Charts)

Machine Learning & CV: Logistic Regression, Classification Models, Feature Engineering, Computer Vision, Real-Time Gesture Recognition

Methodologies: Exploratory Data Analysis (EDA), Hypothesis Testing, Literature Review, Data Cleaning & Wrangling, Business Statistics, KPI Dashboard Development

Tools & Version Control: Git, GitHub, Jupyter Notebook, VS Code

PROFESSIONAL EXPERIENCE

Data Analyst Intern – Robotics Research & Analysis | [Vijai Robotics](#) | New Delhi, India *June 2025 – Present*

- Designed and maintained automated data pipelines using Python (Pandas, NumPy) to clean, transform, and structure high-dimensional robotics telemetry and operational datasets, improving data readiness for downstream analysis.
- Authored complex SQL queries utilizing multi-table joins, subqueries, CTEs, and window functions to extract and segment data from corporate databases, reducing manual reporting time.
- Built executive-level Power BI dashboards with custom DAX measures to track research milestone KPIs, providing real-time visibility into project performance metrics.
- Leveraged advanced Excel functions (INDEX-MATCH, dynamic pivot tables) to perform rapid ad-hoc hardware performance audits for engineering and leadership stakeholders.

TECHNICAL PORTFOLIO PROJECTS

Bank Customer Churn Analysis | *Python | Pandas | Seaborn | Matplotlib | EDA*

- Conducted a structured analytical study — including literature review and hypothesis formulation — to investigate why ~16% of banking customers churn despite ~84% retention, uncovering behavioral and transactional root causes.
- Performed deep-dive EDA using Pandas to analyze customer demographics, account activity, and product usage patterns, identifying key churn drivers such as low engagement scores and single-product dependency.
- Visualized churn distribution, feature correlations, and segment-level insights using Seaborn and Matplotlib, producing stakeholder-ready charts that translated complex patterns into actionable retention strategies.

AI-Assisted Gesture Control System | *Python | MediaPipe | NumPy | OpenCV | Computer Vision* | [View on GitHub](#)

- Built a real-time, hands-free PC control system using MediaPipe and OpenCV that detects hand landmarks via webcam and maps gestures to system-level actions without any physical input device.
- Engineered left-hand gesture recognition to control system volume and right-hand gestures to adjust screen brightness in real time, using mathematical distance calculations (math, NumPy) between finger landmarks for precision.

- Demonstrates applied computer vision and human-computer interaction (HCI) skills — bridging data engineering with AI-powered real-world automation.

Used Car Price Analysis & Valuation Model | *Python / Pandas / Seaborn / Matplotlib / EDA*

- Conducted end-to-end analytical research — including literature review and hypothesis testing — to identify the primary drivers of used vehicle pricing, covering factors such as mileage, brand, age, fuel type, and transmission.
- Performed structured EDA using Pandas to clean and explore a multi-feature automotive dataset, uncovering statistically significant correlations between vehicle attributes and market valuation.
- Developed a logic-based classification framework to distinguish fairly-priced listings from overpriced ones, providing a replicable decision-support model applicable to consumer finance and automotive analytics use cases.

EDUCATION

Bachelor of Commerce (B.Com)

2020 – 2023

MBPG College, Kumaun University – Haldwani, Uttarakhand

CERTIFICATIONS

- **Deloitte Data Analytics Job Simulation Certificate** (Forage) — Commercial EDA, client metric dashboards, and analytical insight delivery.
- **Data Analyst Professional Certificate** — Data cleaning, analytical scripting, and database architecture management.
- **Data Modeling in Power BI** — Advanced relational data modeling, schema optimization, and DAX calculations.
